

# MOVANNA

## Maize

### Maturity Class: FAO 210

MOVANNA is DSV UK's most consistent forage and AD variety. This vigorous, mid-harvest performer has a very robust agronomic package with excellent standing power and resistance to fusarium and eyespot, all of which means a healthy plant, even if harvest is delayed.

MOVANNA is listed as suitable for Very Favourable sites from the NIAB / BSPB data and is ideal for forage and AD. It is a tall, dark green variety, which has increased its popularity with biogas growers.

With proven performance on-farm and in independent BSPB/NIAB trials, MOVANNA is a later intermediate type, which is ideal for spreading the harvest and/or drilling window. It is a stiff plant with a low percentage score for lodging (1.9%). This variety's excellent vigour (7.1) supports rapid growth at the start of the season that culminates in high dry matter yields at harvest (19.5t/ha).

Site Type	Very Favourable
Forage	Yes
AD	Yes
Grain	
FAO	210
Dry matter content at harvest (%)	32.8
Dry matter yield (t/ha)	19.5
Dry matter yield (% of 4 and 5 year varieties)	99
ME of fresh plant at harvest (MJ/kg dry matter)	11.45
ME yield of fresh plant at harvest (1000s MJ/ha)	224
Starch content of whole plant at harvest (%)	33.5
Starch yield of whole plant at harvest (t/ha)	6.53
Cell wall digestibility (%)	57.0
Early Vigour	7.1
Standing power at harvest (root lodging) (1-9)	7.5
Leaf senescence (1-9)	4.2
Eyespot rating (1-9)	5.9
