

BEATRIX CL

Clearfield® Hybrid Oilseed Rape

A Clearfield®
Variety

A Quad Layered
PNN Variety

RLM7+ Disease
Resistance

Turnip Yellow
Virus Resistance

Pod Shatter
Resistance

High Oil Content

Status: AHDB Recommended List 2026/27

DSV are delighted to add BEATRIX CL to its portfolio of Clearfield® winter oilseed rape varieties. It is one of the first Quad Layered PNN varieties to offer a complementary package of traits, with no compromise on quality. BEATRIX CL has four major traits, which include RLM7+ stem canker resistance, TuYV Protection, Pod Shatter Resistance and Clearfield® Technology.

BEATRIX CL offers a significant advance in the marketplace to be one of only a few to offer TuYV in the Clearfield® segment. This powerful yield-enhancing trait possessed by all highest-yielding recommended varieties is an essential feature in the post-neonic era of growing oilseed rape.

BEATRIX CL boasts the second-highest yield out of the Clearfield varieties, 91% (UK) Seed Yield and 92% (UK) Gross Output. Its key performance area appears to be in the East and West region, where it has some very strong scores, as well as having an outstanding Oil Content (46.1%). Beatrix CL is the highest untreated yield and gross output in the Clearfield category. Beatrix CL has a robust Resistance to Lodging [8] and Stem Stiffness (8). It is early to flower (7) and to mid-early to mature (6) – these are all essential traits that any grower should consider when selecting a variety to produce on farm. With the addition of Pod Shatter Resistance as well as RLM7+ resistance to stem canker, it delivers one of the best agronomic packages to date.

Gross Output	93% (UK) 93% (E/W) 89% (N)
Seed Yield	91% (UK) 92% (E/W) 88% (N)
Oil Content	46.4%
Winter Hardiness	High
Autumn Vigour	High
Spring Vigour	High
Plant Height	155cm
Flowering	7
Maturity	6
Lodging	[8]
Stem Stiffness	8
Light Leaf Spot	5
Stem Canker	5
