

TRAVOLTA

Winter Oilseedrape

HARVEST with the right Groove

Travolta has been tested in several European countries with good results and under widely different growing conditions, which testifies to its great growing safety. With a flowering up to 4 days before the most common varieties and with pod shatter resistance gives a certain flexibility in terms of harvest time without compromising on yield and oil content.

- ✓ Early variety with high yield and oil content
- ✓ Top variety in several countries in Europe
- ✓ Low plant height ensures an easy harvest with good lodging tolerance
- ✓ Robust under different growing conditions
- ✓ Pod shatter resistance

Yield information

Seed Yield 2025 (%)	106
Oil Content 2025 (%)	52.6
Gross Output 2025 (%)	105

Resistances

Phoma	RLM 7
Light Leaf Spot	Medium-tolerant
Verticillium	Medium-tolerant

Agronomics features

Autumn Development		vigorous
Winter Hardiness		good
Plant Length		compact - medium
Lodging Resistance		Strong- very strong
Maturity		early
Pod-Shatter Resistance		Very strong
