

ACTIVO

S 230 | ca. K 200

Kicks off early – strong in both grain and silage

Profile

ACTIVO represents a significant breakthrough in spreading harvest dates across large areas, mid-drilling dates, and ensuring a reliable crop within marginal regions. ACTIVO naturally matures with stay-green traits, providing increased flexibility at harvest, resulting in top overall yields and exceptional quality for livestock or AD. Additionally, ACTIVO is well-suited to CCM production, excelling as a cob-filling varietiy with an intermediate starch yield and outstanding energy and biogas yields. In challenging growing seasons, ACTIVO surpasses medium-maturing varieties for the UK, setting new standards for exceptional yields and quality.

This variety is presently tested at the NIAB for national listing.

- Quick juvenile development
- Intermediate starch content
- Great cob filling

General

Usage	
Silo mature	mid-early
Grain maturity	early
Maturity forage	230
Maturity grain	ca. 200
Type of grain	flint intermediate
Hybrid	Single-cross
Sowing date	early | late

Agronomics Features

Early Vigour Favourable	1 2 3 4 5 6 7 **(8)** 9	
Leaf senescence Favourable	1 2 3 4 5 6 **(7)** 8 9	

Data Source: Breeder Data.
Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

Resistance to diseases

Maize smut	+ + ○
Helminthosporium	+ + +

Location

Limited areas	✓
Soil type	heavy | light
Humidity	wet | dry

Sowing

Forage	7 - 9 Plants/m²
