

# ACTIVO

Kicks off early – strong in both grain and silage

ca. S 220 | ca. K 210

## Profile

ACTIVO represents a significant breakthrough in spreading harvest dates across large areas, mid-drilling dates, and ensuring a reliable crop within marginal regions. ACTIVO naturally matures with stay-green traits, providing increased flexibility at harvest, resulting in top overall yields and exceptional quality for livestock or AD. Additionally, ACTIVO is well-suited to CCM production, excelling as a cob-filling variety with an intermediate starch yield and outstanding energy and biogas yields. In challenging growing seasons, ACTIVO surpasses medium-maturing varieties for the UK, setting new standards for exceptional yields and quality.

This variety is presently tested at the NIAB for national listing.

- ✓ Quick juvenile development
- ✓ Intermediate starch content
- ✓ Great cob filling

## General

Usage

<b>Silo mature</b>	early
<b>Grain maturity</b>	early
<b>Maturity forage</b>	ca. 220
<b>Maturity grain</b>	ca. 210
<b>Type of grain</b>	flint intermediate
<b>Hybrid</b>	Single-cross
<b>Sowing date</b>	

## Agronomics Features

Early Vigour Favourable

Leaf senescence Favourable

Data Source: Breeder Data.

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

## Resistance to diseases

Maize smut

Helminthosporium

## Location

Limited areas

Soil type

Humidity

## Sowing

Forage

7 - 9 Plants/m<sup>2</sup>
