

## ACTIVO

CA. S 220 | CA. K 210

Kicks off early – strong in both grain and silage

### Profile

ACTIVO represents a significant breakthrough in spreading harvest dates across large areas, mid-drilling dates, and ensuring a reliable crop within marginal regions. ACTIVO naturally matures with stay-green traits, providing increased flexibility at harvest, resulting in top overall yields and exceptional quality for livestock or AD. Additionally, ACTIVO is well-suited to CCM production, excelling as a cob-filling variety with an intermediate starch yield and outstanding energy and biogas yields. In challenging growing seasons, ACTIVO surpasses medium-maturing varieties for the UK, setting new standards for exceptional yields and quality.

This variety is presently tested at the NIAB for national listing.

- ✓ Quick juvenile development
- ✓ Intermediate starch content
- ✓ Great cob filling

## General

Usage	
Silo mature	early
Grain maturity	early
Maturity forage	ca. 220
Maturity grain	ca. 210
Type of grain	flint intermediate
Hybrid	Single-cross
Sowing date	

## Agronomics Features

Early Vigour Favourable	
Leaf senescence Favourable	

Data Source: Breeder Data.

Breeder classification: +++ = very good / very high | ++ = good / high | + = medium

## Resistance to diseases

Maize smut	
Helminthosporium	

## Location

Limited areas	
Soil type	
Humidity	

## Sowing

Forage

7 - 9 Plants/m<sup>2</sup>
