

LICAPO

Brassica napus W

Profile

LICAPO is a high-yield 00 forage rape, what means it is free of erucic acid and low content of glucosinolates. This variety is suitable both for grazing and for silage-mixtures; the leaf health and high leaf ratio of LICAPO ensures good forage uptake and low pasture residue. It has a good general resistance and high leaf to stem ratio ensure a good palatability and digestibility.

- High-yielding 00 forage rape
- high leaf to stem ration ensures a good palatability and digestibility
- Well suited for silage production or grazing

Tends to

Flowering	1 2 3 4 5 6 7 8 9	very low

Yield characteristics

Dry matter yield total	1 2 3 4 5 6 **7** 8 9	high
Early growth development	1 2 3 4 5 6 **7** 8 9	strong

Classification according to the descriptive variety list - Bundessortenamt (federal plant variety office, Germany) 2020 and our own results.

All specified information is given to the best of our knowledge and belief, but without guarantee on completeness and correctness. Despite care we cannot guarantee that the described characteristics are repeatable / comprehensive in agricultural practice in each case. DSV United Kingdom Ltd. excludes adhesion for damage or claims for damages, resulting of the use for the variety specified in this description.
