

AROLDO

A robust solution to enhance productivity and sustainability

ca. S 210 | ca. K 210

Profile

AROLDO is a maize variety that matures quickly and has excellent early growth. Despite its tall appearance, the hybrid possesses excellent lodging resistance and stem stability. The cob has 16 kernel rows and a good cob filling all the way to the tip. The grain is a flint-dent-genetic intermediate type. The silages yield a considerable amount of biogas and have a starch level that is above average. Great yields were also achieved when the hybrid was tested in Germany, Denmark, and Austria.

This variety is presently tested at the NIAB for national listing.

- ✓ Quick juvenile development
- ✓ Good cob filling all the way to the tip
- ✓ Great for biogas and dairy cattle feeding

General

Usage

Silo mature	early
Grain maturity	early
Maturity forage	ca. 210
Maturity grain	ca. 210
Type of grain	flint intermediate
Hybrid	Single-cross
Sowing date	<div style="display: flex; justify-content: space-between;">early0late</div>

Yield information

Dry matter yield (t/ha) 20.49

Agronomics Features

Early Vigour

Standing power at harvest
(root lodging)

Leaf senescence

Data Source: Breeder Data.

Resistance to diseases

Maize smut

Helminthosporium

Location

Soil type

Humidity

Sowing

Forage

7 - 9 Plants/m²
